

## THE LOMA SERIES

Vent Free Gas Log Heater

# Solana

Superior design, performance and features together with true, wood-burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

# Innovation on fire

It isn't often that a product line offers looks, features, performance and quality at a level to lead an entire industry in virtually every category. The Loma Series™ from Design Dynamics™ presents this rare opportunity with the beautiful new Solana Vent Free Gas Log Heater.

## Dramatic Realism

The Solana's intricately detailed log stack and glowing ember bed are painstakingly recreated from an actual wood fire complete with logs, coals and embers. Then they're hand finished in natural wood tones throughout the deep bark patterns, split wood highlights, and even the smoked, charred features of an active fire. The Solana features a dual burner design that re-creates a deep, glowing ember bed and plenty of yellow flame.

## Outstanding Performance

And a glowing flame presentation like this in a vent free heater can only be achieved through superior design and nearly perfect fuel combustion and efficiency. The Solana's dual stainless high efficiency burner design maximizes the glowing and heating properties of the ceramic log material, yet still achieves the cleanest, most complete burn in the Industry!

## Absolute Safety

You can rest assured that your new Solana is the safest vent free gas log heater available. In addition to standard oxygen depletion safety controls, and industry-leading, clean flame combustion technology, the entire log set is unitized in a pre-assembled arrangement. This feature assures maximum performance and eliminates the possibility of log misplacement or movement, and potential degradation of indoor air quality. The control and gas train are 100% factory assembled and tested.

## Instant Enjoyment & Convenience

The Solana's unitized design also makes installation a breeze. Just complete the gas connection using the shut-off valve and stainless flex connector provided. And unlike other manufacturers, Design Dynamics' logs don't require any break in or "burn off" period, so you can enjoy your new heater instantly with the convenience of hand-held remote control.

## Standard Features:

- Realistic ceramic fiber 9-log set and ember bed is unitized to assure safety, performance, and ease of installation.
- Dual flame, high efficiency burner system for realistic look and feel, creates active, colorful flame presentation and plenty of glowing coals.
- Hand-held remote control
- Decorative control cover, log scraps, and lava floor cinders complete the custom hearth presentation.
- 99% heating efficiency.
- Fully assembled millivolt gas train assembly; front mounted for easy access and includes matchless, piezo igniter.
- Dual certification for use as a vent free gas heater (ANSI Z21.11.2) or as a vented, decorative gas appliance (ANSI Z21.60.A-2000).

Solid, unitized log arrangement is intricately detailed.

Gas train/control assembly is fully assembled and factory tested.

Standard feature components include hand-held, multi-function remote control

## Available Accessories

- Damper clamp (for use as vented decorative gas appliance)
